1 INTRODUCTION

AT&T Office@Hand is a business phone system that connects employees with one solution. It offers enterprise-grade features, including auto-receptionist, multiple extensions, and more.

This SIP registration guide will demonstrate three methods for integrating Algo IP endpoints with AT&T Office@Hand. These methods are listed by functions within AT&T Office@Hand: Paging Device, Limited Extension, and User Phones. The best method will depend on the Algo IP endpoint being provisioned and its intended application.

For additional information on how to use the platform, see the <u>AT&T Office@Hand User Guide</u>.

This guide only outlines configuration details for registering Algo IP endpoints to AT&T Office@Hand. For additional information on device configuration, see the <u>user guide for your specific Algo product</u>.

2 PAGING DEVICES

Devices provisioned as paging devices do not have a phone number or internal extension. Registration via Paging Devices allows your Algo IP device to be registered to AT&T Office@Hand for public announcing.

Recommend use:

• One-way paging (single or multi-site)

Do not use for:

- Two-way communication
- Initiate calls
- Receive regular telephone calls
- Any application requiring DTMF, such as DTMF zoning and DTMF for door control
- Loud or night ringer

2.1 Configuration

You will need to open both AT&T Office@Hand and the web interface for your Algo IP endpoint to register your device. To begin:

1. <u>Log-in to AT&T Office@Hand</u> and open Phone System \rightarrow Phones & Devices \rightarrow Paging Devices.

Home Users Phone	ffice@Hand System Meetings Reports ~ Billing M	More	Admin Portal 🗸 🇱 P2		
Company Info	Phones & Devices » Paging Devices		22

12. Select **Paging device**, click **Continue**, and select the Algo IP endpoint(s) to add to the group.

Add device to group							
Which type of device would you like to add? User phone Paging device Limited extension phone 							
	Cancel Continue						

13. You may now page the connecting paging device. To do so, dial *84. When prompted, enter the page group extension number followed by #.

3 LIMITED EXTENSION – COMMON AREA PHONE

The AT&T Office@Hand Limited Extension is an extension with features limited primarily to calling. This extension has limited features and is not tied to a user.

Recommend use:

- Two-way communication using Algo IP speakers or intercoms
- Initiating or receiving regular telephone calls
- DTMF zoning (multicast or analog zone controller)
- Door control (via DTMF) with intercoms

Do not use for:

- Loud or night ringer (call queue membership is not supported)
- One-way paging (single or multi-site). Using the Paging Devices method is a simpler option.

3.1 Configuration

You will need to open both AT&T Office@Hand and the web interface for your Algo IP endpoint to register your device. To begin:

1. <u>Log-in to AT&T Office@Hand</u> and open Phone System \rightarrow Groups \rightarrow Limited Extensions.

	ffice@Hand	Admin Portal ~ III RZ

4 USER PHONE – FULL EXTENSION

An AT&T Office@Hand full extension is possible for user phones. This creates a digital line that can initiate or receive regular telephone calls.

Recommend use:

 Loud or night ringer (call queue membership is supported) Do not use for:

 Any other application besides loud or night ringing. Other methods are better suited for applications outside of loud or night ringing. See Paging Devices and Limited Extensions above for more details.

4.1 Configuration

You will need to open both AT&T Office@Hand and the web interface for your Algo IP endpoint to register your device. To begin:

1. <u>Log-in to AT&T Office@Hand</u> and open Phone System \rightarrow Phones & Devices \rightarrow User Phones.

AT&T C	ffice@)Hand			
Home Users Phone	System	Meetings Reports ~ Billing	More		
Company Info	Phones &	& Devices » User Phones
