

IP Dual-Sided Display Speaker for Visual and Audible Notification

With two-sided 15.6" LCD display screens, high-intelligibility speakers, and high visibility LED flashers, the 8410 can produce highly attention-grabbing visual and audible messages for emergency and day-to-day events along hallways, corridors, and large open spaces.

The 8420 IP Dual-Sided Display Speaker is a SIP-compliant and multicast-capable PoE endpoint designed to deliver two-sided audio and visual communication. Comprised of three core components – a 15.6" LCD display, high-intelligibility speakers, and high visibility LED flashers, the 8420 is dual-sided, each side mirroring the other to offer two-sided paging, notification, and alerting capabilities.

The primary element of the 8420 is the two opposite-facing LCD display screens. With unlimited visual possibilities, the screens can produce scrolling text, flashing announcements, full-color images, or key data points such as dates and times. Combined with LED backlighting and wide-angle viewing, the visual display can be seen from anywhere in a room or along a hallway. It can be customized to complement an audio announcement or to bring communication to an audio-less environment.

For audible alerting, the 8420 delivers wideband HD audio for clear voice communication and attention-grabbing audible alerting. An embedded microphone is included to enable ambient noise response and talkback capabilities.

The LED flashers provide additional awareness for important messages. When no announcement or notification is needed, a variety of messages can be displayed, including images, text, or an NTP clock.

FEATURES

- Two 15.6" wide-angle viewable full-color LCD display for off-axis visibility to display digital or analog NTP clock, scrolling text, and custom images
- Wideband HD audio (G.722 voice codec)
- Secure SIP using TLS and SRTP
- Ambient noise response to automatically adjust audio output
- Two-way talkback
- Multicast send and receive
- Four-color LED flashers
- PoE+ powered (IEEE 802.3at) and PoE++ powered (802.3bt)
- Smart relay input for accessories

APPLICATIONS

- Voice paging
- Emergency and safety notifications
- Visual notification
- Zoned paging and notifications
- Suitable environments include: hallway, corridor, reception area, workshop, cafeteria
- The 8420 is ideal for dual-sided applications (for single-sided application, see the 8420)
- Wall and ceiling-mount orientation available via included bracket
