ABOUT

The Protective Cover - 8420 IP Dual-Sided Display Speaker is a polycarbonate cover that can be installed with the 8420 IP Dual-Sided Display Speaker to protect the display screen from accidental contact due to activities in the surrounding areas. The 8420PC can be mounted to a new installation of the 8420, prior to wall or ceiling mount, or mounted directly to an existing 8420 already installed to the wall or ceiling.

The full user guide for the 8420 be found on algosolutions.com/guide/.

Included

- 3/8" Polycarbonate Sheet (2)
- Attachment Brackets (4)
- 10-32 Attachment Screws (8)

⚠️ **Important**
This guide contains safety information which should be read thoroughly before permanently installing the product.
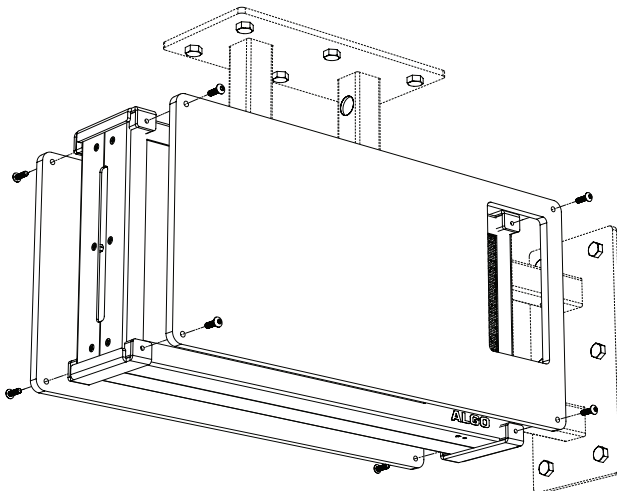

1   INSTALLATION

Before installing, note that adding the 8420PC to an 8420 adds 6lbs (2.7kg) to the total weight of the 8420.

1.   Peel off the protective liners on both sides of each polycarbonate sheet.

2.   Slide the attachment brackets over each corner of the 8420. The rubber
      pads on the bracket will provide a snug fit.

3.   Install the polycarbonate sheet to the attachment brackets on both sides
      using the provided attachment screws. Each side requires four (4) screws.
      Ensure the rectangular cut-out of the polycarbonate sheet is aligned to the
      rectangular speaker grill of the 8420.
